

TESTIMONIAL

MAGDA GREGORSKA - TEACHER

“ We are delighted by the possibilities offered by the LiveWebinar platform. For teachers, the overnight transition from a classroom setting to remote education was a huge challenge. Fortunately, implementing LiveWebinar was simple, and using the platform is easy for both teachers and students alike. We are happy that we can continue teaching and supporting our students in this difficult time. ”

Magda Gregorska, primary school teacher

Ms Magda Gregorska uses the LiveWebinar platform while leading remote lessons. Due to the epidemic threat in Poland, remote learning is obligatory at all school levels and at other educational institutions. This is a big challenge for school boards and teachers, because the Polish educational system had not been adapted to education via the Internet.

How does LIVEWEBINAR HELP MS GREGORSKA?

Due to the lack of guidelines, principals and teachers were forced to search for solutions of their own during the first lockdown (March 2020) and the second wave of COVID-19 (October 2020). Many of them decided to choose LiveWebinar thanks to ease of use, the high-level of technical support, features that enable teachers to work effectively and comfortable learning for students.

Ms Magda Gregorska and 15 other teachers from her school are leading online lessons with the help of LiveWebinar for over 250 students.

For the teachers, the most important features include screen sharing, presentations, and audio and video calls in high quality. According to them, a big advantage is the reliability of the solution, and how students can easily join a lesson with just one click.
