Turning on Audio and Video in Opera

1. Open the main menu of the browser and select “Preferences”.

2. You will then be redirected to the browser settings, from there click on “Privacy & Security” (1), and then “Site Settings” (2).

3. Once in the site settings, select “Camera” from the dropdown menu.
4. Change the settings to “Ask before accessing” by moving the slider. Repeat the same steps for the microphone.
Turning on the Audio and Video in Firefox

1. In the left upper corner click on the Firefox menu and select “Preferences”.

3. Then, select “Allow” at the address of LiveWebinar (app.livewebinar.com). Remember to click “Save Changes” at the bottom of the pop-up window. Follow the same steps for the microphone.
How to Turn on Audio and Video

The following websites have requested to access your camera. You can specify which websites are allowed to access your camera. You can also block new requests asking to access your camera.

Search Website

Website | Status
---------|-------
https://app.livewebinar.com | Allow

Remove Website  Remove All Websites

☐ Block new requests asking to access your camera

This will prevent any websites not listed above from requesting permission to access your camera. Blocking access to your camera may break some website features.

Cancel  Save Changes
Turning on Audio and Video in Edge

1. In the top right corner of your Edge browser, click on the menu (three dots), and go to “Settings”.

2. You will be redirected to the settings page. From there go to the “Site Permissions” (1) and then click on “Camera”.
